1st Swiss Movement Disorders Symposium

Dear Colleagues and Friends,

Welcome to Luzern for the 1st Swiss Movement Disorders Symposium!

Over the past two decades the field of neurodegenerative and movement disorders became one of the most developing areas in Neurology and Neurosciences. In Parkinson's Disease, the exploding progress in neurogenetics led to reconsider the cause and mechanisms of the disease; increasing knowledge on mechanisms of cell death led to the concept of neuroprotection and to the need of preclinical diagnosis; treatments are increasingly complex and subject to controversies as do the use of imaging techniques. For these reasons we chose Parkinson's Disease for our first meeting which should be as interactive as possible, not only between the speakers but mainly thanks to your participation.

We would like to thank the scientific and organizing committees, the speakers, and the sponsors for their help in preparing and presenting this symposium, which, we hope, will inaugurate a new Swiss tradition for the end of the summers.

Hoping that you will enjoy the symposium as much as we enjoyed preparing it,

With kind regards,

Claudio Bassetti

François Vingerhoets

Scientific program

1st Swiss Movement Disorders Symposium

Lucerne, September 3–4, 2009

Thursday September 3

- 18.30 h Arrival
- 19.00 **Dinner with Video-Session**
Moderation: E. Broussolle, E. Tolosa, D. Waldvogel
Videos presentations by: H. Brunnschweiler, G. Kägi, U. Roelcke, C. Städler

Friday September 4

- 9.30 h Welcome
C. Bassetti
- 9.45 h **Genetic of Parkinson's disease**
Moderation: F. Vingerhoets
Basic science: C. Vilariño-Güell (USA)
Clinical science: B. Widder
- 10.45 h Coffee break
- 11.15 h **Preclinical Parkinson's disease**
Moderation: C. Bassetti
Basic science: K. Jellinger (Austria)
Clinical science: W. Oertel (Spain)
- 12.15 h Lunch

- 13.30 h **Parkinson Schweiz: Research Projects 2009–2010**
Moderation: H.-P. Ludin
- K. Meier, Parkinson Schweiz: Learning in partnership
 - Project 1: H. Russmann
 - Project 2: M. Schüpbach
 - Project 3: Ch. Baumann
 - Project 4: A. Kaelin
 - Project 5: J. Fritz-Steuber

14.30 h Workshop 1: **Neuroimaging is needed in PD**
Pro: P. R. Burkhard; Contra: E. Broussolle (France)

Workshop 2: **Some drugs are better for de novo PD**
Pro: A. Kaelin; Contra: P. Fuhr

15.30 h Coffee break

16.00 h Workshop 3: **Non motor manifestations of PD: Current treatments are effective**
Pro: G. Kägi; Contra: Ch. Baumann

Workshop 4: **Surgery for PD: Routine rather than exception**
Pro: M. Schüpbach; Contra: D. Grabli (France)

17.00 h **This year's news in Parkinson's disease**
W. Oertel (Germany)

17.30 h Farewell Drink
and see you at the 2nd Swiss Movement Disorders Symposium on September 2–3, 2010!
