2nd Swiss Movement Disorders Symposium

Dear Colleagues and Friends,

Welcome again to Lucerne for the 2nd Swiss Movement Disorders Symposium!

We are delighted that we will be able to welcome three world leaders in their respective fields of interest in Lucerne, Mark Hallett, Kailash Bhatia and Jeffrey Kordower:

- Mark Hallett and Kailash Bhatia will present the extraordinarily difficult but for us clinicians immensely important subject of psychogenic movement disorders, both from a clinical and a pathophysiological point of view.
- Jeffrey Kordower will then bring us up to speed on the basics that we need to know about stem cell therapy, while Pierre Burkhard will give us the clinical perspective.

Due to last year's success, we will start the meeting with a video session, offer different workshops addressing controversial questions in movement disorders management and highlight current research projects in Switzerland. Peter Fuhr will conclude the meeting with a wrap-up of the worthy news in the field.

As you can see, this year's meeting is not to be missed!

We would like to thank the scientific and organizing committees, the speakers and the sponsors for their help in preparing and presenting this symposium, which should soon become a new tradition for Movement Disorders Enthusiasts in Switzerland.

Hoping that you will enjoy the program we have lined up as much as we enjoyed preparing it, we are looking forward to seeing you at the symposium in Lucerne.

Claudio Bassetti

François Vingerhoets

Scientific program

2nd Swiss Movement Disorders Symposium

Lucerne, September 2–3, 2010

Thursday September 2

Pre-Meetings

- 13.30 h – Meeting «Forschungsausschuss Parkinson Schweiz»
15.30 h *Members are cordially invited by H. P. Ludin. On special invitation only.*
15.30 h – Meeting Swiss Multicenter Trials Study Group
17.30 h *You are cordially invited by C. Bassetti and F. Vingerhoets.*

Official Start of the Symposium

- 18.00 h Arrival and Welcome «Apéro riche» (1st course of the dinner)
19.00 h **Video-Session with sit down dinner**
Moderation: Waldvogel/Hallett (USA)
Video presentations by: Bassetti, Benninger, Bohlhalter, Kägi, Schüpbach, Wider, Zutter

Friday September 3

- 9.15 h Welcome/Introduction
Bassetti/Vingerhoets
- 9.30 h **Session I: Psychogenic Movement Disorders**
Moderation: Bassetti
Basic science: Hallett (USA)
Clinical science: Bhatia (UK)
- 10.30 h Coffee break

- 11.00 h **Session II: Stem Cells and Gene Therapies in PD**
Moderation: Vingerhoets
Basic science: [Kordower \(USA\)](#)
Clinical science: [Burkhard](#)
- 12.00 h Lunch
- 13.15 h **Session III: Movement Disorders Research in Switzerland**
Moderation: Ludin/Bassetti
– Parkinson Schweiz Research Projects 2010 – 2011
– Swiss Multicenter Trials 2010–2011:
[Bassetti](#): Rasagilin and Sleep in PD
[Wider](#): Clinical and genetic characterization of PD and other movement disorders
[Burkhard](#): Epidemiology of Parkinson’s disease: The Swiss initiative
[Baumann](#): The impact of continuous transdermal rotigotine on depression, cognitive performance, sleep, and wakefulness
- 14.30 h Workshop 1: **RLS: Easy to diagnose and treat**
Pro: [Möller](#); Contra: [Baumann](#)
- Workshop 2: **Primary and secondary tremors: Surgery safe and effective**
Pro: [Pollo](#); Contra: [Stibal](#)
- 15.30 h Coffee break
- 16.00 h Workshop 3: **TMS as routine diagnostic/therapeutic tool**
Pro: [Benninger](#); Contra: [Russmann](#)
- Workshop 4: **Neuroprotection**
Reality: [Kaelin](#); Myth: [Waldvogel](#)
- 17.00 h **Session IV: This Year’s News in Movement Disorders**
[Fuhr](#)
- 17.30 h End of the 2010 symposium – see you again at the
3rd Swiss Movement Disorders Symposium in Lucerne, Sep 1–2, 2011!
