Dear Movement Disorders Enthusiast,

Mark your calendars! The 15th Swiss Movement Disorders Symposium will be held in Lucerne from August 28–29, 2025.

Expect good food, fine wine, fantastic company, and - of course - unforgettable teaching moments during our Thursday evening program, featuring the always-popular video session. Friday morning kicks off with Manju Kurian, who will share her unparalleled expertise in pediatric movement disorders. Then, don't miss Aurélié Méneret's talk on rare but treatable movement disorders — an absolute must!

Next, Roxanne Lofredi will delve into how DBS modulates cortico-subcortical circuits, followed by our Best Paper Award presentation. A particular highlight for our younger colleagues will be Emmanuel Flamand-Roze's introduction to The Move — his brilliant and intuitive method for teaching movement disorders.

We'll round off the symposium with a beloved tradition: the Best Papers and Videos of the Year, this time expertly presented by Ilaria Bertaina and Cécile Hübsch.

We can't wait to welcome you to Lucerne — don't miss it!

Daniel Waldvogel, Francois Vingerhoets, Christian Lüscher, Selma Aybek, Christian Baumann, Julien Bally and Bettina Balint

Thursday, August 28th 2025

Official Start of the Symposium

18.00-19.00 h Arrival & Welcome

19.00 h Video session with sit-down dinner

Moderation: Bettina Balint, Emmanuel Flamand-Roze & Manju Kurian
Various Presenters

Friday, August 29th 2025

8.30 h Arrival & Registration

9.15 h Welcome & Introduction Daniel Waldvogel & François Vingerhoets

9.30 h Session I: Movement Disorder's Models

Title: Precision medicines for rare complex pediatric movement disorders

Moderation: Bettina Balint

Speaker: [Manju Kurian](#)

10.30h Coffee break

11.00 h Session II Rare Movement Disorders

Title: Treatable rare movement disorders

Moderation: Julien Bally

Speaker: [Aurélie Méneret](#)

12.00 h Lunch

13.00 h Session III: Eberhard Ketz Honorary Lecture for Neurorehabilitation in Movement Disorders

Modulation of corticosubcortical circuits by DBS and their implications for Neurorehabilitation.

Moderation: Carlo Wilke

Speaker: [Roxanne Lofredi](#)

13.45 h Best Movement Disorders Paper Award 2024 / 2025

Moderation: Christian Lüscher

14.00 h Coffee break
